Abstract

This study aims to describe the types of sentences spoken by the Sakaliou Clan in South Siberut, Mentawai Islands Regency. This research is a type of case study research. In this study, researchers used a purposive sample by analyzing 2 video transcripts of the Sakaliou Clan in English when speaking to foreign tourists on a tour. From the 2 transcripts, there were 4 types of sentences based on the level of difficulty, namely simple sentences with 5 data, compound sentences with 6 data, complex sentences with 4 data, and complex compound sentences with 1 data. Furthermore, there is a cultural influence in the way the Sakaliou speak English.

INTRODUCTION

English proficiency is versatile to varies aspects. In fact, it becomes essential in the tourism sector. The english language enables people to penetrate tourism at international level. In addition, it is widely spoken by people who are involved in the tourism industry. In the other words, english for tourism has long been an intrict disciplines of english for specific purpose. Especially, since tourism itself has its own approach. It means, the success of tourism is achievable, as long as the tourist guide has the ability in english.

On the west coast of Mentawai Island Regency, survives an ethnic group known as Sakaliou Clan in the Rereiket region of South Siberut, where International tourists traveling to find the most rewarding and fascinating tourism destination. More spesifically, foreign tourists guest looking for authenticity that remains at the mercy of unique culture, indigeneous tribe, oldest technique tattoo, and amazing adventure atmosphere. Hammons (2014:3) states Sakaliou Clan has been hosting tourists since 1970, therefore these clan members had the generations in a sense of handling foreign guests and had exposed to english language since foreign tourist guests visiting Sakaliou Clan. Furthermore, almost every week Sakaliou Clan received and hosted International tourists, ranging from small groups, medium groups, even in a large groups of tourists. It can be concluded that Sakaliou Clan has wide open opportunity to have the experience of talking, living, and mingling with all the foreign guests that enables this Clan can speak english unconsciously. In the other words, it gives possibility

to Sakaliou Clan getting along and talking to tourists in english. At the same time, it becomes the influence of the english speaking for Sakaliou Clan.

In case of spoken english uttered by Sakaliou Clan, the researcher finds out that these clan members understand english language based on seeing, hearing, and paying attention to what is happening around. Moreover, undeniably understand what the other person is saying allows these Clan members to connect with tourists in interacting. Moreover, in general, escorting tourists push the host to explain certain things asked by outsiders. Because, the purpose of tour programs offered must be able to be explained to the guests. In addition, the user of language is usually considered as people who are able to use that language to produce communicative language. In other word, knowing how to construct sentences, enabling spoken and written information throught the language easy to be delivered.

For the several clans inSouth Siberut, the Sakaliou Clan hasthe most experience hosting foreign tourists. It means, this Clan already familiar with english language as well as how to handle the tour works. In fact, in order to use language, people need to produce sentences. Since language is spoken, it is containing words and sentences.

Reffering to the explanation above, the researcher is interested to conduct the research with Sakaliou Clan with the title "English Sentence Type Uttered by Sakaliou Clan in South Siberut Mentawai Island Regency".

METHOD

The researcher using case study as research method. According to Given (2008:68) case study is a research approach in which one or a few instances of a phenomenon are studied in depth. More explanation, the understanding of case studies extends from being a specified tool in a purely positivist scientific research endeavor to being a pedagogical strategy in education and social learning process. Moreover,the purpose of the case study research focuses on individual perceptions in a social process.

Furthermore, Ary (2010:29) states, case study is a type of ethnographic research study that focus on a single unit, such as one individual, one group, one organization, or one program. More explanation, the object of case study is to arrive at a detailed description and understanding of the entity. From the author explanation above can be concluded, a case study is widely used.

In addition, Heigham & Croker (2009:68) defines, case study is elusive. In the other words, case study is not methodological choice, but an object to be studied. More explanation, case study is an empirical inquiry that investigates a contemporary phenomenon within its real life context, especially when the boundaries and contexts are not clearly evident. It means, the case study is a bounded system and the researcher's task is to identify and explore the boundaries.

For getting the elaborate information toward this undergo research, the researcher needs participants. According to Given (2008:598) participants are usually considered to be individuals or groups who agree to take part in a research process. It means, participants are the selected individuals or groups that suitable and available with the criterion as well as willing to be searched based on the research question. To conduct this research, the researcher chooses 2 members of Sakaliou Clan in which accounted on travel video as two tour guides which the most sought after by the foreign tourist guests.

In this research, the researcher using purposive sampling, because it is appropriate to take participants. According to Ary (2010:156) purposive sampling refers to judment sampling which sample elements judged to be typical, or representative, are chosen from the population.

The researcher using documentation method to collect the data. Given (2008:232) explains, document is a text-based file that may include primary data collected by the researcher or secondary data collected and archieved or published by others as well as photographs, charts, and other visual materials.

FINDINGS

The researcher find out what were the english sentence types uttered by Sakaliou Clan in South Siberut Mentawai Island Regency after researcher had analyzed the sentence types uttered by the these Clans in using english when these clan members entertains or hosts foreign guests. Furthermore, the researcher using documentation in the form of 2 videos to support the data in an effort to find out what were the sentence types uttered by Sakaliou Clan. Based on the analysis of the sentence type uttered by these Clans that refers to the Altenberg & Vago's theory founded generally the Sakaliou Clan members could use all four types of sentences.

In the type of simple sentences found 5 sentences, in the type of compound sentences found 6 sentences, in the type of complex sentences found 4 sentences, and in the type of compound-complex sentences found 1 sentence. It can be concluded that Sakaliou Clan was able to use all four types of sentence, but compound sentences used more.

CONCLUSION

This research was conducted in order to answer the following research question: What are the english sentence type uttered by Sakaliou Clan in South Siberut Mentawai Island Regency. In this research, the researcher found all the four types of sentence based on Altenberg & Vago's theory, they were simple sentence, compound sentence, complex sentence, and compound-complex sentence. In the simple sentence found 5 data, in the compound sentence found 6 data, in the complex sentence found 4 data, and in the complex sentence found 1 data. Moreover, the Sakaliou Clan frequently used compound sentence in hosting the foreign guests. Because, in the compound sentence, the Sakaliou Clan who works as a tourist guide using that sentence for a deeper explanation.

In addition, the researcher found that the way of Sakaliou Clan spoke english was influenced by the concept of Mentawaai People think.
